

Appendix H

Catalog of Surface Mapping

Appendix H

Catalog of Surface Mapping

This appendix contains a general index of maps from Washington, Oregon, and Idaho, that includes areas covered by the CRBG. Because the Washington portion of the Columbia Basin is the primary target for natural gas storage, two reports issued by the Washington Division of Geology and Earth Resources also are included with this appendix. These reports are:

- Index to Geologic and Geophysical Mapping of Washington, Part I – Published and Open-Filed Reports 1899-2001 by Connie J. Manson, February 2002.
- Index to Geologic and Geophysical mapping of Washington, Part II – Theses 1901 – 2001 by Connie J. Manson, February 2002.
